Own material list with all details as above is attached as Annex  with issue date

# Declaration of innocuousness of the materials

## acc. EN ISO 13688:2013, section 4.2 and Annex B

### Protective clothing

The user of the PPE should not experience any adverse health effects under normal, foreseeable conditions of use.

We declare that the type applied for complies with the requirements of EN ISO 13688:2013 for materials used in the manufacture of protective clothing.

- OEKO-TEX® - certificates exist for each material used (see list of materials).
- PZT GmbH is commissioned to check the following criteria for materials used:

Pkt.	Prüfmerkmal	Prüfverfahren nach	Einheit	Anforderung
a)	Chromium (VI) content (in leather clothing)	ISO 17075	mg/kg	< 3
b)	Nickel release for metallic materials (e.g. buttons and fittings)	EN 1811	µg/cm <sup>2</sup>	< 0,5 / week
c)	pH value (for leather and textiles)	ISO 4045 – leather ISO 3071 – textiles	pH	3,5 < x < 9,5
d)	Detection of azo colourants	ISO 17234-1 – leather ISO 14362-1 – textiles	mg/kg	not detectable

We further declare that in foreseeable conditions of normal use, the materials do not release any substances that are generally known to be toxic, carcinogenic, mutagenic, allergenic, toxic to reproduction or otherwise harmful. Likewise, we have examined the ecotoxicity and other influences on the environment.

**As required by clause 8 of EN ISO 13688:2013, protective clothing shall be supplied to the customer with written information in a language which can be easily understood by consumers and other final users, as determined by the Member State concerned.**
