

Manufactuerer's Declaration according to Australian/New Zealand Standard AS/NZS 1270:2002

Objekt:

Page 1 of 2

2.1.1 General

All parts shall be finished smooth and free from sharp edges and from irregularities that could be a potential hazard or cause discomfort to the wearer.

Hearing protectors, other than disposable or user formable earplugs, shall be durable in construction.

2.1.2 Earmuffs

All edges of earmuffs which are in contact with the earmuff cushions shall be rounded, finished smooth, and free from sharp edges which could cause damage to the cushions.

Over-the-head straps shall be supplied with all earmuffs designed to allow the clamp band to be worn behind the neck or under the chin.

2.2 MATERIALS

Materials used in the construction of hearing protectors shall be suitable for the conditions of use; in particular

(a) metal parts shall be made of corrosion-resistant metal or shall be treated so as to be corrosion-resistant;

(b) materials which may come in contact with the skin shall be non-staining, soft, pliable, and not likely to cause skin irritation, and shall be resistant to perspiration, ear wax, and skin and hair oils; and

(c) materials shall be capable of being cleaned and disinfected except for user formable hearing protectors.
